

IN THE DRAWINGS

Applicant respectfully requests approval of the following drawing changes.

Figure 1 has been amended to illustrate a view line used in Figures 3 and 4, and a view area detailed in Figure 5. Figures 3-5 have been added to illustrate claimed embodiments of the present invention and to more clearly illustrate features described in the specification. Specifically, Figure 3 illustrates an exemplary structure and relationship of deflagration chamber 100 which is annular and extends circumferentially around centerbody 56 within engine nozzle 50. Figure 4 illustrates an alternative exemplary structure and relationship of deflagration chamber 100, which is non-annular and includes a plurality of non-annular deflagration chambers 100 that extend axi -symmetrically and circumferentially around centerbody 56 within engine nozzle 50. Figure 5 illustrates an exemplary vaneless radial nozzle. No new matter has been added by the proposed drawing changes. Submitted herewith are Replacement Sheets for Figures 1 and 2, as well as new Figures 3-5, which include the above referenced changes to Figures 1,3-5 and pagination changes to all sheets.
